

How to Use the Safer Journey Card

The following step-by-step guide, using photos will show how the Safer Journey Card has been designed for use.

Step 1 – Print off the Safer Journey Card and remove or fold the edges

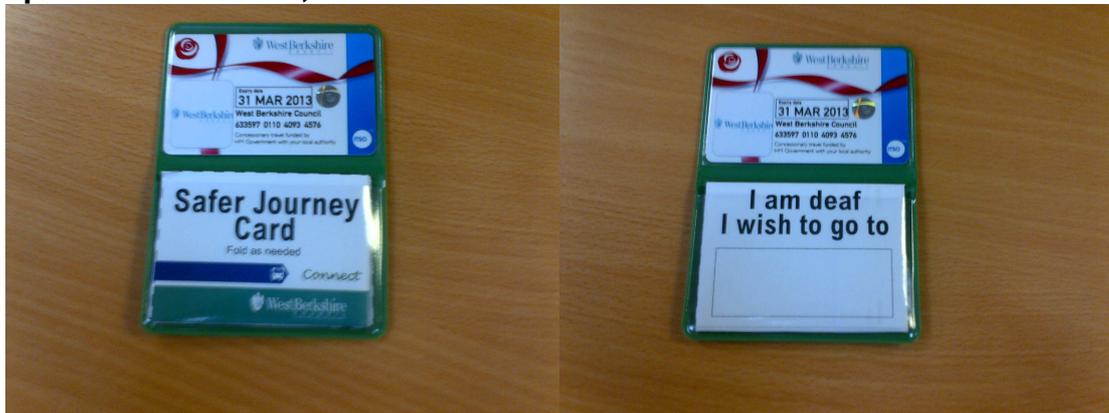

Step 2 – Fold horizontally, firstly the bottom row on itself, and secondly, the top row backwards, so that the Safer Journey Card is neatly folded into one row.

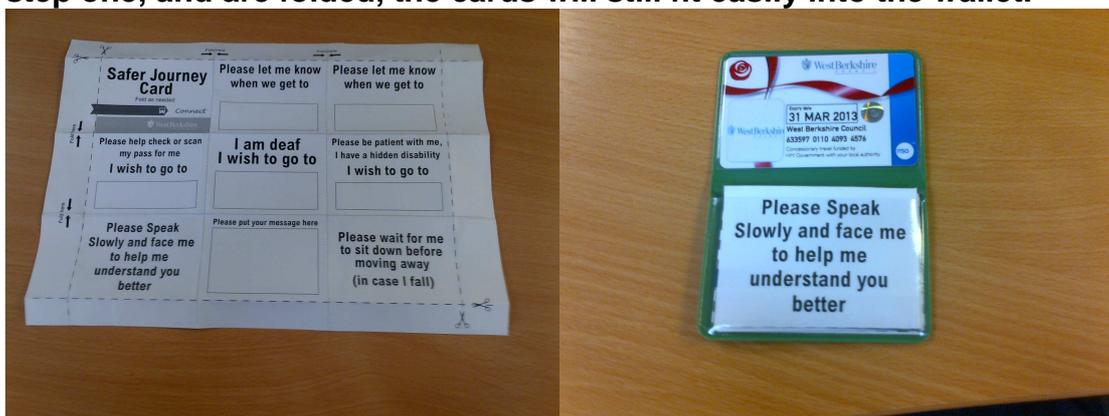

Step 3 – Fold vertically, firstly the right hand cards in on themselves, and the left hand cards outwards, leaving the Safer Journey Card neatly folded into the size of one card. Now, when the top and bottom most cards are pulled outwards, the Safer Journey Card should neatly reveal without the need for folding. The same should be true when returning them back into shape.

Step 4 – Place the Safer Journey Card into the Concessionary Pass Wallet, along with the Concessionary Pass. Users can refold the Safer Journey Card to show the message best meeting their needs. In the given boxes, users can write a message to help communicate either a specific instruction, or their intended destination.

If users are not able to cut off the edges of the Safer Journey Card in step one, and are folded, the cards will still fit easily into the wallet.

If you don't want to fold your Safer Journey Card, or you have difficulties opening and closing the cards, you can just cut out each individual card, and keep just the ones you need.
