Ref: WBC LPR Regulation 19 Objection.

Dear Sirs,

I have lived at this address since [REDACTED] but this latest development between 1500 to 2500 houses to be built opposite to where I live is like adding another town to the already encroached area and feel it is totally unsustainable.

I am writing in to object to say No to Thatcham NE Development as the plans presented as I find them unsound, for the following reasons:

- Increased traffic flow - this is already over stretched especially getting onto Foxglove Way especially in the mornings, there are tail back from the existing estate, and during schools runs, this new development will only exhaust the situation even further, as there are no plans to relieve this road or others.
- Healthcare - Thatcham Healthcare Service is already well over stretched, not being able to get a Doctor's appointment for over 6 weeks, again I cannot see strategic healthcare planning within this newly proposed development.
- Impact on the Environment – Building on Greenfield sites which are classed as “Natural outstanding Beauty” and causing detrimental impacts to legally protected wildlife.
- Where is WBC plans for reducing pollutant gases on the carbon footprint, supporting this development will surely make the situation worse.

I trust these points will be seriously considered.

Yours sincerely,

Anthony Reeves
